

- Twin bearing system handles thrust loads, extends service life
- Hollow rotating spindle/internal cooling circuit reduces bearing temperature
- Compact design
- Quiet energy efficient design
- Other sizes, voltages and material available
- Few moving parts for easy maintenance

Part	Material
1 Casing	GFRPP
2 Impeller	GFRPP or CFRPP
3 Spindle	Ceramic
4 Bearing	PTFE
5 Thrust Ring	Ceramic or PE
6 O-ring	FKM (fluoroelastomer) or EPDM
